SUMMARY

Applied Computer Science student (**AI specialisation**) at Thomas More with a track record of taking production web platforms from discovery to deployment. Experienced across the full lifecycle—from full-stack web applications (**TypeScript, Next.js, PostgreSQL**) to analytical pipelines and machine learning workflows (**Python**). Seeking a **2026–2027 internship in software, data, or AI engineering**.

EDUCATION

Thomas More University of Applied Sciences — B.Sc. Applied Computer Science (AI) 2024 – 2027 (exp.)

Coursework: Machine Learning, Deep Learning, Data Science, Cloud & DevOps, App Security

Prior studies: IT coursework at Univ. of Georgia (Tbilisi, 2021–2022) & Diploma in IT, BMIC (2018)

EXPERIENCE

Deerfield Property Holdings LLC — deerfieldpropertyholdings.com United States (Remote)

Full-Stack Web Developer (contract) — sole technical owner Jul 2026 – Present

- **Sole technical owner:** architected, built and shipped the company's first web platform and custom webmail infrastructure from discovery to production.
- **Engineered the full stack in a Turborepo monorepo:** built the public marketing site and internal staff portal using **Next.js 16 (App Router), React 19, TypeScript** and **Prisma/PostgreSQL** on Neon/Vercel.
- **Streamlined operations:** designed relational schemas and admin workflows managing properties, tenants and applications, replacing manual spreadsheets.

Enduring Steps (NGO) — enduringsteps.org United States (Remote)

Full-Stack Web Developer (volunteer) — rebrand & rebuild lead Jul 2026 – Present

- **Rebrand & full-stack rebuild lead:** led discovery and re-architected a legacy site into a dynamic platform with custom branding and transactional email automation via **Resend/React Email**.
- **Production monorepo & auth:** shipped a **Turborepo** (Next.js 16, React 19, Tailwind v4) with a **Prisma/Postgres** admin portal, **Zod**-validated Server Actions, **Auth.js** credentials and TOTP 2FA.

FEATURED PROJECT

View all projects at victorc.sinners.be

Lizard Species Deep Learning Classifier GitHub link

- Built an advanced computer vision model using transfer learning (**EfficientNet**) in **TensorFlow** to accurately classify multi-class lizard species from image data.
- Implemented data augmentation and model optimization strategies, achieving a high 0.76 Macro F1 score on complex visual classification tasks.

Previous Experience — Operations & Client Service

Dispatch Manager, Dispatch Pro Ltd (Tbilisi) Jun 2021 – Aug 2023

Customer Service & Front Desk, Renaissance Downtown Hotel (Dubai) Mar 2019 – Apr 2021

Managed high-volume emergency dispatch, guest escalations, staff training, and conflict resolution across fast-paced environments.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, Java, PHP, SQL, React 19, Next.js, Tailwind CSS, Spring Boot, Laravel, FastAPI, .NET

Database, Cloud & Tools: PostgreSQL, Prisma, Neon, Zod, Resend, AWS, Google Cloud, Vercel, Docker, Turborepo, Linux, Git, Figma

Spoken Languages: English (native); Dutch (beginner)
